# Draft Beer Control

AndroTAP

Optimize your operations and protect from "over-pouring" with our proven and tested system.
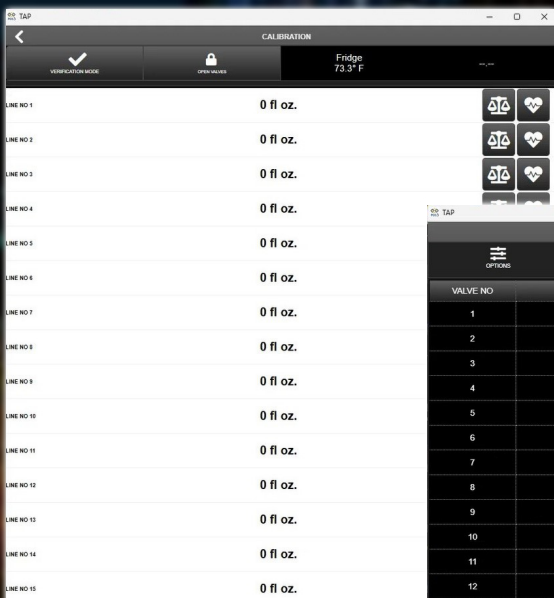

Compatible with all POS systems.

Every draft beer order appears on the screen with the total ounces left to pour.
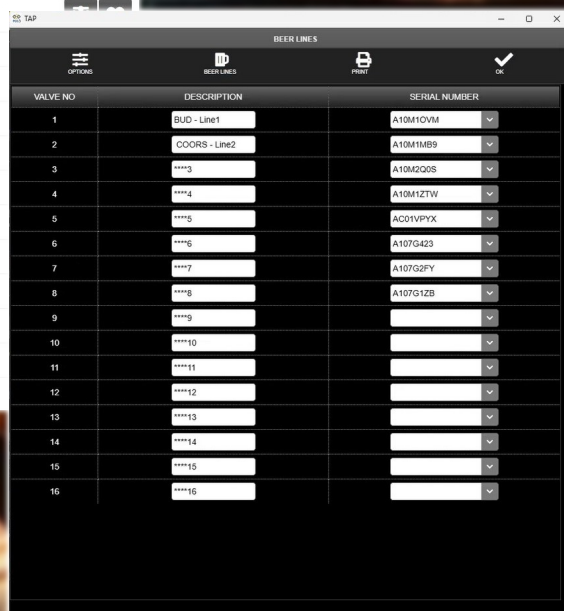

2-zone temperature and pressure readings with alarms.

Overide switch for cleaning.

8-port beer line HUB

Easy Calibration

Easy Beer Line Setup

Valve & flowmeter control box

Control 16 lines of draft beer per unit and unlimited number of units.

Easy installation just connect to beer line in cold room or fridge.

Requires CAT5 cable per beer line back to the control HUB which provides power to the valve unit, flowmeter and temp probe.
